MICROCONVEX HANDHELD ULTRASOUND

SonoEye P6 VET

A compact curved probe for small-animal abdominal, reproductive and cardiac examinations.

6 MHz	IP67	DICOM
Microconvex array	Housing rating	Image transfer

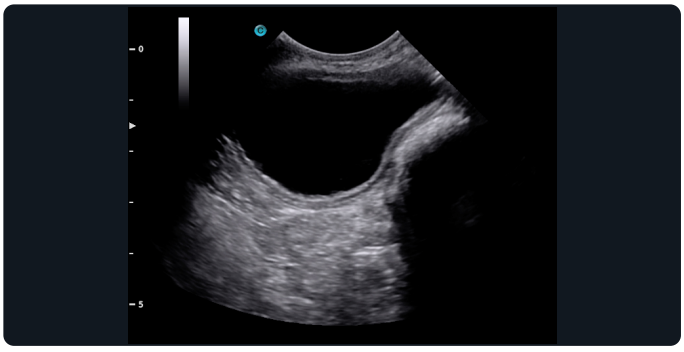

Technical highlights

Abdominal imaging — Curved field of view for examinations of the liver, bladder, intestine and adrenal glands.

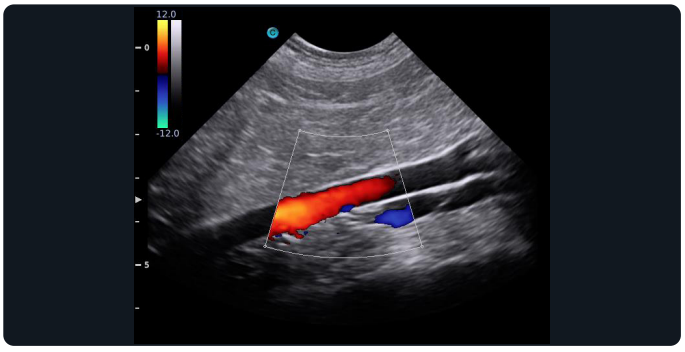

Flow and motion — Colour Doppler and pulsed-wave Doppler complement B-mode, dual B-mode and M-mode.

Probe controls — Programmable buttons, SonoRemote and automatic pulsed-wave Doppler tracing support the scanning workflow.

Clinical images

Canine bladder | B-mode

Canine aorta | Colour Doppler
