MOBILE ULTRASOUND FOR SHARED SCANNING ROOMS

SonoPort VET

Wheel the SonoPort 8 VET between consult and treatment rooms for abdominal and cardiac examinations on the same console.

Mobile cart
Room-to-room scanning

3 array types
Phased, convex and linear

4 gates
Simultaneous Doppler sampling

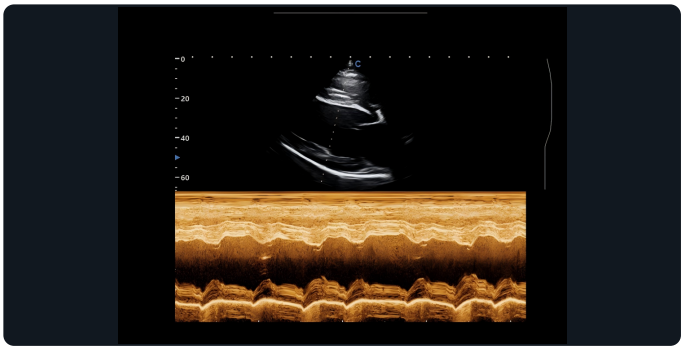

Scanning workflow

Choose your probes — Configure the cart around your caseload with the S4-10 phased, C4-11 convex and L4-10 linear probe options.

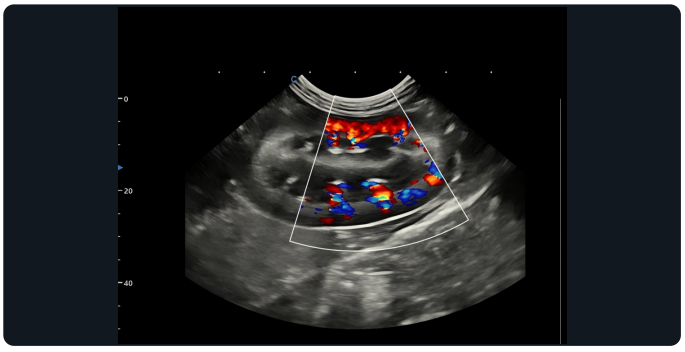

Compare blood flow — Sample up to four sites at once with SonoPW to compare flow signals during a single acquisition.

Assess tissue — Use tissue Doppler and strain-rate imaging to assess heart wall motion, or elastography to examine tissue stiffness.

Clinical images

Canine heart | M-mode

Canine kidney | Colour Doppler
